

I respectfully urge you to reject NAB's petition 04-160. Our nation's broadcast airwaves are not to be dominated by a select few who get to dictate what the population hears. Rather, diversity and options in radio programming (re: competition) should be applauded and encouraged. I subscribe to satellite radio (pay a user fee) to hear what I want to hear, when I want to hear it -- let the consumers decide what is best for him.

Very respectfully,

Joel Partridge
